Brief Bio

With years of experience in full-stack development, I build modern, efficient, and user-focused digital solutions for startups and growing businesses. Specializing in Vue.js, Nuxt.js, Node.js, and MongoDB, I turn ideas into fast, scalable, and visually refined web applications. From responsive interfaces and multilingual dashboards to payment integrations and custom platforms, I focus on performance, clean UX, and reliable delivery. Across fintech, education, real estate, and e-commerce, I create polished, future-ready products that help businesses grow.

Professional Experience

NOW

Frontend Developer ODIX Pay Trading, Dubai, United Arab Emirates

MAR 2025

At ODIX PAY, I develop core fintech platforms by building responsive dashboards, intuitive user flows, and high-performance interface components while integrating backend systems to manage real-time data and ensure seamless functionality across the product. I continuously improve the user experience by refining layouts, enhancing accessibility, and maintaining consistent visual and interaction patterns throughout the platform. I also focus on optimizing frontend reliability by resolving issues, boosting performance, and upholding security and quality standards across all features.

DEC 2024

Frontend Developer Tamkin, Dubai, United Arab Emirates

JUN 2024

At Tamkin, I converted detailed Figma designs into fully responsive interfaces using TailwindCSS while integrating backend functionality to ensure smooth and reliable performance across the platform. Working with Vue.js and Nuxt.js, I developed custom UI components and advanced modules, including a synchronized video and audio player built to support sign-language interpretation. I also implemented Stripe payments and a dynamic multilingual dashboard, enhancing both usability and accessibility. Throughout the project, I refined the overall design by contributing concepts, improving visual consistency, and incorporating feedback from collaborative sessions.

MAY 2023

FullStack Developer EduTesla, Cairo, Egypt

AUG 2023

Worked as a full-stack developer building digital systems that support universities and students across Türkiye, creating responsive interfaces and improving backend workflows to make the entire platform easier and more reliable to use. Focused on simplifying application and enrollment processes, enhancing performance, and ensuring smooth interaction between students, staff, and administrators. Contributed new features, solved technical challenges, and collaborated with the team to continually improve the overall experience of the education platform.

JUL 2020

Backend developer SideKick Real-Estate, Cairo, Egypt

JUL 2019

Worked on building and maintaining backend systems by developing RESTful APIs that enabled smooth communication between different platforms. Focused on improving scalability by adding new features and optimizing existing code, while also identifying and fixing issues quickly to keep the system stable. Collaborated closely with the frontend team to ensure seamless integration across the entire product. Regularly monitored backend services and databases to maintain strong performance and reliability.

JUL 2019

Full Stack developer 249 Media Productions, Khartoum, Sudan

DEC 2018

Handled full-stack development for 249 Media Productions by building and maintaining the company's website and digital platforms. Focused on creating responsive pages, enhancing backend functionality, and ensuring stable performance across all features. Collaborated with the team to update content, refine design elements, and improve overall usability, helping the company present a professional, consistent, and user-friendly online presence.

DEC 2018

Full Stack developer New Horizon Training Center, Khartoum, Sudan

APR 2018

Handled full-stack development for 249 Media Productions by building and maintaining the company's website and digital platforms. Focused on creating responsive pages, enhancing backend functionality, and ensuring stable performance across all features. Collaborated with the team to update content, refine design elements, and improve overall usability, helping the company present a professional, consistent, and user-friendly online presence.

Professional Skills

Business Technical Skills

- Requirements Analysis & Solution Architecture
- Technical Feasibility Assessment
- System Design & Scalability Planning
- API Strategy & Integration Planning
- Process Automation & Optimization
- Data Handling & Information Management
- Security & Compliance Awareness (Fintech-friendly)
- Cross-Platform Development Understanding
- Agile/Scrum Development Practices
- Product Feature Planning & Technical Prioritization

Lingual Skills

Native Arabic, and Fluent English Speaker

Technical Skills

Core Web Technologies

Databases

Frameworks & Libraries

Tools

Testing Tools

Servers/ Infrastructure

NOW

2016

Educational Background

Self-Taught Web Developer

Independent learning through real projects, online courses, and continuous study of modern development practices.
